

Sol Park

(425) 326-2651 | solpark@princeton.edu | <https://sol-park.vercel.app/>

Education

Princeton University

B.S.E., Computer Science; Minors: Quant. Econ., Comp. Bio., Philosophy

Sep 2024 – May 2028

Princeton, NJ

Relevant Coursework: Programming Systems, Machine Learning, Data Structures and Algorithms, Probability and Stochastic Systems, Real Analysis, [Graduate] Statistical Genomics

Mercer Island High School

Sep 2020 – May 2024

Notable Titles: Student Govt. President, Drum Major in Macy's Thanksgiving Day Parade, Coding Club President

Technical Skills

Programming Languages: Python, Java, TypeScript, JavaScript, C++, C, SQL, HTML/CSS, Solidity, R, C#

Tools / Frameworks / Libraries: React Native, Git, PyTorch, PostgreSQL (Supabase), AWS Cloud, Numpy

Soft Skills: Leadership, Communication, Data Analysis, Creativity, Problem Solving, Testing, Collaboration

Languages: English, Korean (native/fluent), Chinese (elementary)

Experience

ML Platform Engineering Intern

July 2026 – Present

Remitly

Seattle, WA

- Creating a causal inference model to determine reasons for customer churn.

Software Engineering Intern

May 2025 – August 2025

Nirvana Carbon Solutions (NCS)

West Bengal, India (Remote)

- Programmed a Python optimization tool mapping biochar pit and water irrigation locations using spatial data from Google Earth, improving farming efficiency for Indian farmers helping advance carbon reduction efforts.
- Led a team of 5 to map 3,000+ hectares of coastal land for mangrove restoration, using R to convert files, identifying parishad (county) locations of each plot of land that has mangrove deforestation—the largest effort of its kind.

Projects

The Initiative for CryptoCurrencies & Contracts

June 2026

Project: <https://safeconstruct-test.vercel.app/>

Princeton, NJ

- Deployed a blockchain-based safety credential system using Solidity, Hardhat, and ethers.js on Base Sepolia (EVM), implementing a relayer wallet pattern to eliminate private-key exposure for issuers.
- Built a full-stack web application with Next.js, TypeScript, Supabase Auth, and Prisma ORM on PostgreSQL, designing a role system that allows a user to have certain privileges in one organization and other privileges in another.
- Created a credentialing platform using Next.js and Supabase Auth, and a shadow-user flow that allows credentials to be issued to workers before account creation.

Fantasy Football Drafter

Jun 2026 – Present

Project: <https://fantasy-auction-drafter.streamlit.app/>

Seattle, WA

- Built a fantasy football auction valuation engine in Python, transforming ML-based point projections into auction dollar values through value-over-replacement modeling.
- Designed a real-time draft-day app on Streamlit that tracks opponents' budgets and roster needs live, which recommends optimal max bids and nomination strategy under a budget constraint of \$200.

ThirdPlace

Mar 2026 – Present

Project: <https://github.com/sollymolly/ThirdPlace>

Princeton, NJ

- Building mobile app using React Native, implementing real-time UI updates using Supabase for a map that uncovers “fog” based on wherever one goes.
- Designed PostgreSQL schema in Supabase with multiple tables and cascading deletes, used to cleanly remove user data.
- Integrating Google Places API by normalizing responses and using coordinate-based queries to have accurate location tracking.

Leadership

Investor Relations Principal | Senior Investments Analyst

Sep 2024 – Present

Princeton Student Ventures (PSV)

Princeton, NJ

- Leading investment theses with SciFi VC, analyzing young consumer sentiment on Fintech companies and researching enabling technologies; sourced, maintained, and continuing relationship with VC Partner.
- Conducted due diligence (Senior Investment Analyst), using market analysis (TAM/SAM/SOM, CAGR), analyzed data on customer retention, and more, to grant funding up to \$10K for Princeton-founded startups.
- Spoke to more than 15 founders from Princeton and beyond, gaining experience in proper communication, helping entrepreneurs with direction while also providing them with proper motivation and guidance.
